

To add the reference to the SautinSoft.Document.dll, follow these steps:

1. In Visual Studio: Solution Explorer (right click by the project name) -> Manage Nuget Packages ...

2. In the tab "Browse" type: SautinSoft, then select "sautinsoft.document" and install it.
We recommend you to install the latest version.

Well done!

Now your application has all features provided by SautinSoft.Document.

Here you'll find a lot of useful examples and articles:
